MusicReader uses page view and page turn settings which might sometimes be confusing. In this article we briefly show an overview to make you understand this.

There are **three page views** in MusicReader:

- One Page View - Shows one full page at a time.
- Two Pages View - Shows two pages onscreen.
- Half Page View - Shows half page at a time.

For One & Two Page Views there are three ways to turn pages:

- Whole Page - it turns a full page at a time (one page view) or two pages (two page view)
- Half Page - this turns half a page at a time (one page view) or one page (two page view)
- Standard - this turns the way that is set in Page Settings, you can determine it for each page.
